Spying incident creates Excitement. AKSAM (Ankara): The RPP has taken action about the news that one of its deputies was involved in an espionage incident. There has been no reaction from the JP as yet. It is learned that the investigation about this espionage is run by the military authorities. It is expected that the National Assembly will be asked to lift the immunities of the deputy and senator concerned. The military authorities which are running the investigation have also applied to the Ministry of Foreign Affairs to find out if the espionage is entirely economic or if there is a political aspect to it also. It is learned that the two parliamentarians involved in the incident are senator Alaettin Cetin (JP-Corum) and deputy Celal Sungur (RPP-Yozgat). Sungur said on this subject yesterday, "I personally know Silavik. RPP Deputy Resat Onder (now a GP member) introduced him to me. He said that he had a big firm in Istanbul. I gave the man no report and received no money from him. I heard of his arrest from Resat Onder sometime ago. I am administrative chief of the National Assembly. As I speak a foreign language I

take care of all the foreign journalists in Parliament. My giving a report is out of the question. Because we are in opposition we do not know state secrets. I only know what everyone knows. What report could I give under the circumstances?"

SON HAVADIS (Ankara) - Turgut Pojon who has been arrested for spying for the Soviet Union is a disbarred leftist. He worked in the Turkish Embassy in Vienna for a while as a commercial consultant and met Silavik there. The National Security Organization which is running the investigation secretly has established that "some persons who have access to the security secrets of the state" are also involved in the affair. However, some persons with knowledge who are anxious about the discovery of the espionage or an "underground organization" are feverishly working to save those connected with Pojon and it was found noteworthy that they have accused two parliamentarians.
